3D - The Challenge and the Opportunity *insights from the BBC* **www.bbcacademy.com**
Speakers: Kevin Doig, Lecturer, BBC Academy and Mark Jacobs, Producer, BBC

Creative Networks welcomes this month's speakers from the BBC Academy. Kevin Doig is a Broadcast Engineer and Mark Jacobs is a Director Producer. Their presentation will cover some of the technical aspects of 3D as well as some of the exciting prospects for programme content.

The BBC Academy puts training and development at the heart of the BBC and also works with the wider broadcast industry, equipping people with skills they need for a lifetime of employability in the ever-changing media landscape. As well as training staff, it also has a remit under the terms of the BBC's Charter Agreement to train the wider industry and shares much of its training with the UK broadcasting industry for free. Some of the courses are also offered on a commercial basis, here and abroad.

The College of Journalism's website www.bbc.co.uk/journalism is a unique resource which has over 2,000 pages of text and around 1,500 films, audio and interactive exercises. The College of Production website, www.bbc.co.uk/collegeofproduction, the first of its kind for the production community in the UK, provides practical advice on all aspects of TV, Radio and Online production.

The Centre of Technology focuses on providing training in broadcast engineering & technology, as well as all relevant business systems and is developing training in software engineering.

To join us for this FREE event, please email creative.networks@bcu.ac.uk or call Dave Taylor on 0121 331 5400. Alternatively, register online at our website www.creativenetworksonline.com
