

CREATE-CONNECT-COMMUNICATE

Welcome class of 2019/20!

We have set you a summer warm-up project in order to start thinking about your intentions for the MA and what you would like to achieve on the course. When you arrive we will ask you to write your own Programme of Study. This warm up task will help to prepare you for this and will form the basis of your primary research.

THE PROJECT:

- Think about why you want to do your MA. What did you write in your personal statement when you applied for the course?
- Begin to collect and compile a collection of objects, artefacts, articles, images, ideas, fabrics, photographs or drawings etc., which express your creative/professional identity.
- You could include something that you have previously produced on another course or within industry.
- You could start with an object or image that you treasure, explain why it is of value to you and how it might form the basis of your work?
- We want to get to know who you are and your professional identity!
- Consider how these items express you as a professional and how you will present them?
- You can present your project in any format, a physical box, a book, a board, a digital format such as a film or a PowerPoint, a collection of photographs, a performance or presentation
- You will be put into small groups from a mixture of MA programmes to share your project and introduce yourself and get to know each other!
