

JEWELLERY MINI LECTURES

Creative Careers

This talk provides an insight into the different creative careers your students may pursue upon graduating and the types of jobs that some of our students have gone on to. It highlights the different styles of work that may be undertaken within the creative industries and provides guidance on how to get ready for a career in a creative pathway.

Jobs in Gemmology and Jewellery

This talk provides an insight to what we offer at the School of Jewellery. Including BSc (Hons) Gemmology and Jewellery Studies degree, HND Jewellery, BA (Hons) Jewellery and Objects and BA (Hons) Horology. It will highlight the many and varied career options available to our graduates. The talk will include some of our graduate success stories detailing their progression into their exciting gemmological, horology and jewellery careers.

Hands-on Etching

Your students can try their hand at the ancient art of etching metal using acid and other chemicals. They will learn to transfer a pattern to metal using a resist and then cut it into the metal chemically. They will take their plate away with them at the end of the day.

Horology

This mini lecture delves into how an oscillator is used to determine the accuracy of a domestic timekeeper.
