

Module Specification

Module Summary Information

1	Module Title	Introduction to Palliative and End of Life Care
2	Module Credits	20
3	Module Level	Level 6
4	Module Code	LBR6577
5	Semester Taught	2

6	Module Overview
<p>This module will develop your knowledge and skills to enable you to bring together theory and practice in the field of palliative and end of life care.</p> <p>Module content will provide you with the knowledge required to support and care for patients requiring palliative and end of life care. This incorporates holistic assessment, symptom management, supportive communication, bereavement needs, advance care planning, spiritual and psychological needs.</p> <p>The course has been designed to enable you to develop specialist knowledge and skills to enable you to provide safe and effective palliative and end of life care to individuals whilst also supporting the patient's family/ carers/ significant individuals.</p> <p>The module is aimed predominantly at graduate health care practitioners caring for those with a palliative illness who wish to develop and progress their education to a post graduate level of study.</p> <p>This module aligns with the Professional Practice Programme and is designed to be flexible, and practice led. You will have the opportunity to develop skills of enquiry, reflection and problem solving. Delivery of this module will be online and will include live and pre-recorded learning opportunities to enable flexibility of learning.</p> <p>You will be encouraged to think critically and share practice experiences with your fellow students, as well as engaging in both directed and self-directed learning activities. You will be an active partner in your own learning and development and in return you will receive regular feedback and feed forward aimed at developing your academic skills and have the opportunity to discuss your progress with the module team.</p> <p>This module aligns with the Professional Practice Programme philosophy and is designed to be flexible and practice-led. You will have the opportunity to develop skills of enquiry, reflection and problem solving. A blended learning approach is taken in line with the University's learning and teaching strategy. You will be encouraged to think critically and share practice experiences with your fellow students, as well as engaging in both directed and self-directed learning activities. You will be an active partner in your own learning and development and in return you will receive regular feedback and feedforward aimed at developing your academic skills, and have the opportunity to discuss your progress with the module team.</p>	

7	Indicative Content
