

Projected completion for UK-domiciled full-time first degree 2018-19 starters, by subject within provider

- This table contains projected completion outcomes for UK-domiciled full-time first degree starters in 2018-19. These outcomes have been calculated using the Higher Education Statistics Agency's (HESA's) UK Performance Indicators Table T5 methodology, with minor adaptations to account for intercalation years, students qualifying in previous years and non-standard academic years. Technical information on the Table T5 methodology can be found at: <https://www.hesa.ac.uk/data-and-analysis/performance-indicators/outcomes/technical>

- Starters projected to leave their original provider and start at a new provider at first degree level or higher (transfer) are considered to have neither a positive or negative outcome, so are removed from the starter population at the original provider before the other projected outcome proportions are calculated.

- **This data is experimental** and should be considered alongside the research report 'Projected completion and employment from entrant data (Proceed)'.
- Data shown as '+' has been suppressed according to the suppression strategy outlined in the technical notes.

- **Further detail and contextual information can be found by expanding columns**, using the '+' buttons above columns L and T or the 'Z' button in the top-left of the sheet.

*The transition matrix summarises the pattern of progression among students in the subject at the provider, following HESA's Table T5 methodology. The number of students contributing to the transition matrix is the total number of students used to calculate the projected completion outcomes. The "enders" are the students entering an end-state in the transition matrix (qualified, transferred or absent).

Projected completion by subject within provider

UKPRN	Provider name	CAH2 subject code	Subject name	Populations			Projected completion rate	
				Number of students contributing to the transition matrix*	Number of starters in 2018-19	Starters not projected to transfer to first degree study or higher	Projected to obtain a degree (%)	Standard deviation
