6	Course Description
	<p>The MSc in Real Estate Management course is an interdisciplinary Master's programme that fuses economic, social and environmental perspectives within a framework for identifying, assessing, designing, delivering and evaluating effective real estate interventions and responses.</p> <p><b>What's covered in the course?</b></p> <p>Our programme reflects synergies with the Master's courses in Planning Built Environments and Environmental Surveying in order to create a programme that works across the whole built environment profession and disciplines.</p> <p>The programme focuses on the interaction between business and legal processes on property ownership and management. It integrates technological, financial, legal and management issues as they relate to property matters.</p> <p>The theoretical underpinning of the course is rooted in real estate which stresses the need for interdisciplinary approaches and solutions.</p> <p>This course will help you to connect the theory and practice of real estate to a range of real life case study challenges. It will give you a framework of knowledge, skills and tools to start understanding the complex world of property, whilst supporting you to become an independent learner and reflective practitioner.</p> <p>Our programme builds on applied academic research and contemporary real estate practice. The course design and delivery utilises our expertise across real estate, sustainability and planning and also brings in external experts and practitioners to address key challenges and opportunities within practice.</p> <p>Our real estate degree courses are designed and developed with support from relevant professional bodies (Royal Institution of Chartered Surveyors) and local professional individuals and practices. Owing to the need to meet these professionally-set learning outcomes, there is little choice in modules within these programmes, although it is possible to begin to specialise with dissertation and project topics.</p>

### 13 Overall Student Workload and Balance of Assessment

Overall student *workload* consists of class contact hours, independent learning and assessment activity, with each credit taken equating to a total study time of around 10 hours. While actual contact hours may depend on the optional modules selected, the following information gives an indication of how much time students will need to allocate to different activities at each level of the course.

- *Scheduled Learning* includes lectures, practical classes and workshops, contact time specified in timetable
- *Directed Learning* includes placements, work-based learning, external visits, on-line activity, Graduate+, peer learning
- *Private Study* includes preparation for exams

The *balance of assessment* by mode of assessment (e.g. coursework, exam and in-person) depends to some extent on the optional modules chosen by students. The approximate percentage of the course assessed by coursework, exam and in-person is shown below.

#### Level 7

#### Workload

##### % time spent in timetabled teaching and learning activity

Activity	Number of Hours
Scheduled Learning	252
Directed Learning	516
Private Study	1032
<b>Total Hours</b>	<b>1800</b>

#### Balance of Assessment

Assessment Mode	Percentage
Coursework	80%
Exam	0
In-Person	20%
