Course Summary Information		
1	Course Title	MA Planning Built Environments
2	BCU Course Code	PT1015
3	Awarding Institution	Birmingham City University
4	Teaching Institution(s) (if different from point 3)	
5	Professional Statutory or Regulatory Body (PSRB) accreditation (if applicable)	

6	Course Description
	<p>The combination of accelerated climate and environmental change, resource pressures and rapidly evolving social, legal and political contexts demand that the planner of the future is better equipped with the science, tools and skills to help shape the high quality multi-functional places we increasingly need. The MA Planning Built Environments course applies theory through practice-based learning, on a campus surrounded by exciting new developments, with excellent industry links.</p> <p>What's covered in the course?</p> <p>On this course, you will learn to identify and evaluate the processes, tools and outcomes of planning that lead to more sustainable places across the built environment.</p> <p>You will learn how to critically assess planning theory and practice and respond to the growing demand for planning practitioners, strategists and consultants to address contemporary and future planning and development challenges within their environmental context.</p> <p>This built environment course will also enable you to understand the development process and the wider linkages with other built environment professions as well as develop the skills required to assess, analyse and offer practical sustainable solutions to spatial planning problems.</p> <p>You will experience applied and autonomous learning through the use of real problems and case study materials and develop your problem-solving abilities, practical competencies, critical appraisal and written and oral communication skills.</p> <p>This course also encourages inter-disciplinary working amongst graduates and professionals from a variety of backgrounds employed within a planning and environment context.</p>

10	Entry Requirements
<p>The admission requirements for this course are stated on the course page of the BCU website at https://www.bcu.ac.uk/.</p>	

11 Course Learning Outcomes	
Knowledge and Understanding	
1	Identify the principles of planning and assess their impact on the evolution of governance frameworks.
2	Identify the key features of the natural, economic, political and social pillars of planning and explore how they inform planning policy and decision making processes and governance frameworks.
3	Identify and apply the principal planning tools (regulatory, incentive, valuation, scenarios and participative) to address spatial planning challenges across the built and natural environment.
4	Explain the origins and application of environmental and planning legislation and policy and identify potential legislative developments at a range of scales.
5	Develop business and managerial approaches and skills that enable the successful implementation of appropriate techniques and technologies related to environmental and spatial planning.
Cognitive and Intellectual Skills	
6	Argue rationally and draw independent conclusions based on a rigorous, analytical and critical approach to demonstration and argument.
7	Synthesise theory and practice to design/implement a range of spatial planning solutions.
8	Interpret and critically evaluate knowledge, concepts and ideas and/or forms of creative expression in a suitably professional manner.
9	Apply interdisciplinary frameworks to the analysis and solution of complex planning and environmental problems.
Practical and Professional Skills	
10	Demonstrate competence across RTPI education outcomes.
11	Access information from a range of sources, such as the internet, journals, books, research papers, and appraise its suitability for Master's level critical thinking and research.
12	Demonstrate the ability to work effectively, both autonomously and as a member of a team, and accept responsibility for actions taken.
13	Recognise and apply professional values and ethics in informing planning excellence.
Key Transferable Skills	
14	Manage your time effectively and prioritise workloads.
15	Use multiple forms of communication and expression, employing them selectively, appropriately and effectively according to the specifics of the task.
16	Access and make appropriate use of relevant information and data for a specified purpose.
17	Manage conflict appropriately in professional situations.
18	Diagnose problems and identify solutions (individually and collectively).
19	Work effectively in a team.

13 Overall Student Workload and Balance of Assessment

Overall student *workload* consists of class contact hours, independent learning and assessment activity, with each credit taken equating to a total study time of around 10 hours. While actual contact hours may depend on the optional modules selected, the following information gives an indication of how much time students will need to allocate to different activities at each level of the course.

- *Scheduled Learning* includes lectures, practical classes and workshops, contact time specified in timetable
- *Directed Learning* includes placements, work-based learning, external visits, on-line activity, Graduate+, peer learning
- *Private Study* includes preparation for exams

The *balance of assessment* by mode of assessment (e.g. coursework, exam and in-person) depends to some extent on the optional modules chosen by students. The approximate percentage of the course assessed by coursework, exam and in-person is shown below.

Level 7

Workload

% time spent in timetabled teaching and learning activity

Activity	Number of Hours
Scheduled Learning	252
Directed Learning	508
Private Study	1040
Total Hours	1800

Balance of Assessment

Assessment Mode	Percentage
Coursework	69%
Exam	14%
In-Person	17%
