6	Course Description
	<p>Our BA Fashion Design Course at Birmingham City University will provide you with a comprehensive fashion design education. The course encourages innovation in both design skills and technical craftsmanship with a focus on sustainability, system thinking and socioeconomic practice. We will provide you with international opportunities and integration with our industry partners to empower you to explore your individuality, creativity, and future employability.</p> <p>The foundation year is an exciting step towards your chosen creative degree pathway. You will embark on a fun, creative year of discovery. An opportunity to innovate, experiment, develop craft and research skills, equipping your professional journey into the creative industries.</p> <p>We will support you to become part of the Birmingham City University's Fashion &amp; Textiles community, where you can fully explore yourself within an inclusive environment, amongst a likeminded and diverse peer group.</p> <p>Our bespoke course encompasses Fashion Design, Textile design, Fashion Business and Fashion Communication degree routes. Providing you a platform to collaborate, share and learn from others. You will develop visual communication, subject specific craft skills, and processes to build confidence and independence ready for the next stage of your degree.</p> <p>We aim to innovate, excite, engage, and challenge you. Inspiring and encouraging you to develop your personal aesthetic, offer sustainable awareness, and ignite a lifelong enthusiasm to learn. We are proud to see our foundation students continuing to thrive as they progress through the degree pathways and graduate as leaders within the industry.</p> <p>Within your first year of undergraduate study, you will explore pure fashion design skills through a fundamental grounding in garment knowledge, construction, materiality, fabric and fibres analysis, tailoring and drape delivered in an atelier environment. In your second year you will discover systems thinking in relationship to Fashion design and our course's structure will allow you to strategically balance between physically traditional and virtually digital craftsmanship. Your final year of study provides you with the opportunity to express your individual design methodology in one of many creative formats, including a collection of garments, fashion products, material research and digital design technology.</p>

	<p>We will guide you with the decision of taking a placement year between your second and final year of study. Our dedicated internal careers team will support you through this process. We are proud that our recent cohorts have taken year placements with renowned designers such as Paul Smith, Christopher Kane and Craig Green as well as industry super brands such as Superdry, NEXT and Adidas. We let you choose your design identity and tread your own design path.</p> <p>You will work with industry experts and a dedicated team of academic researchers and practitioners. A decolonised curriculum structures the innovative approach to 2D and 3D design resulting in diverse experts of your craft. You will study a programme that is specifically designed to produce job-ready graduates with transferrable skills that can form and reshape our industries.</p> <p>Our Fashion Design Course has built a reputation for students entering the industry as original, creative, independent thinking employable designers. Our award-winning graduate portfolios and fashion collections are showcased on international, digital, and local west-midland based platforms.</p>

<b>14</b>	<b>Course Learning, Teaching and Assessment Strategy</b>
	<p>Teaching methods</p> <p>Diversity, inclusion, and equality are at the core of how we engage with our students, colleagues, applicants, visitors, and our stakeholders. Our dedication to EDI pertains to every area of our college Strategy: Dedication to craftsmanship, Entrepreneurism, sustainability and producing creative thinkers and innovators. As a course we recognise our need to be agile in our teaching approach and that delivering this commitment entails ongoing cultural change, challenge, and continued growth.</p> <p>Tutorials</p> <p>Tutorials are integral to our teaching approach, offering bespoke assistance and feedback throughout the course. Each module includes dedicated tutorial time, with optional sessions for assessment feedback. Modules may feature one-to-one tutorials for individualized guidance or a mix of one-to-one and group sessions. Group tutorials foster peer learning and reflection, enabling comparison of creative approaches and sharing feedback. Engaging in these sessions encourages self-assessment and promotes growth by learning from peers' experiences.</p> <p>Lectures</p> <p>Some of your modules lend themselves to the traditional lecture format. Here you will take part in-group lectures in a lecture room or theatre. You will be encouraged to participate, even within this more formal setting, by commenting on the lecture material, offering a view, or by preparing a short response for a session. During lectures, you are asked to keep notes to build up a file of information as preparation for the module assessment. Lecturers may be members of the course academic team or industry specialists and designers who will lecture about their specific area of expertise.</p> <p>Group Discussion</p> <p>Group discussions serve as avenues for exploring your full potential of the project. Through these sessions, you will delve into the implications, influences, content, and challenges associated with project requirements, aiming to discern the most effective approaches. Active engagement in sharing ideas fosters the development of articulate and confident perspectives towards your work.</p> <p>Practical Demonstrations</p> <p>Teaching will also include practical demonstrations from both academic and technical teams. Our specialist will demonstrate the techniques, skills, equipment, and a variety of processes that you will need to know for successful completion of the module.</p> <p>Design Seminars</p>

Teaching will also include seminars from the Fashion Design academic and team and industry guests. Our specialist will demonstrate the design techniques, skills, equipment, and a variety of processes that you will need to know for successful completion of the module. Examples contained within the course are the include illustration, concept development, research methods and digital design approach.

#### Assessment methods

Assessment methods are vital for student learning, promoting reflection and critical thinking. Summative assessments include written and verbal feedback to empower students for future studies. Formative assessment fosters collaboration and aligns with the course's aim to develop industry-relevant skills. Assessments inform both individual growth and professional aspirations, meeting regulatory standards. Modules are evaluated through crits and submitted works, accommodating diverse learning styles. We elevate the assessment experience with dynamic showcases like runway shows and exhibitions, celebrating students' achievements. This approach mirrors the professional landscape, instilling pride and preparing students for their future careers.

#### Sustainability

sustainable practice is paramount to our strategic approach, and it instils core values of ethical production, reducing environmental impact, and promoting social responsibility. Our commitment to continually adapting and working with our stakeholders ensures that we stay aligned with evolving sustainability standards and industry needs. By integrating sustainable principles into the curriculum, students grasp the significance of eco-conscious design, materials sourcing, and manufacturing processes. Collaboration with our stakeholders fosters innovation and accountability, empowering students to drive positive change in the fashion sector. Ultimately, our dedication to sustainability equips graduates with the skills to shape a more environmentally and socially conscious fashion industry.

#### Employment and entrepreneurialism

Career development is integrated throughout the course, aligning with the STEAM agenda, offering work placements, entrepreneurial dedicated modules, and industry-based activities. We foster strong links with employers, involving them in curriculum design and career guidance. Live projects with various companies facilitate engagement with the fashion industry. Second-year internships and optional industry years out develop teamwork and communication skills. These experiences provide invaluable insights into the dynamic fashion industry, helping students identify their place within it.

## 16 Overall Student Workload and Balance of Assessment

Overall student *workload* consists of class contact hours, independent learning and assessment activity, with each credit taken equating to a total study time of around 10 hours. While actual contact hours may depend on the optional modules selected, the following information gives an indication of how much time students will need to allocate to different activities at each level of the course.

- *Scheduled Learning* includes lectures, practical classes and workshops, contact time specified in timetable
- *Directed Learning* includes placements, work-based learning, external visits, on-line activity, Graduate+, peer learning
- *Private Study* includes preparation for exams

The *balance of assessment* by mode of assessment (e.g. coursework, exam and in-person) depends to some extent on the optional modules chosen by students. The approximate percentage of the course assessed by coursework, exam and in-person is shown below.

### Level 3

#### Workload
