

Course Specification

Course Summary Information			
1	Course Title		BEng (Hons) Automotive Engineering with Foundation Year
2	BCU Course Code	UCAS Code	US0822F H338
3	Awarding Institution		
4	Teaching Institution(s) (if different from point 3)		
5	Professional Statutory or Regulatory Body (PSRB) accreditation (if applicable)		

6	Course Description
	<p>Study our Automotive Engineering BEng degree course and join one of the select UK Universities to take part in Formula Student events at Silverstone.</p> <p>Now is a fascinating time to study automotive engineering as you'll have the chance to be at the forefront of developments within the industry. You'll get to work in advanced automotive workshops and laboratories equipped with industry-standard equipment, as well as take advantage of more traditional office-based facilities.</p> <p>We ensure you gain practical experience so that you are equipped to apply engineering science to real life situations. Plus, you'll also have the opportunity to join our BCU Formula Student racing club.</p> <p>What's covered in the course?</p> <p>The Foundation Year course option enables you to study for our BEng (Hons) degree over an extended full-time duration of four years by including a Foundation Certificate (year one of four). The Foundation Certificate provides a broad study programme that underpins the follow-on degree. In order to progress to the next year of your degree, it is necessary to achieve a pass in all of the modules of the Foundation Certificate.</p> <p>Our BEng (Hons) Automotive Engineering is designed to develop you as an engineer able to make a significant contribution to the industry as it goes through an important period of transition.</p> <p>Our engineering courses focus on project-based activities, giving you lots of opportunity to work in teams on projects from design to implementation. This will give you practical experience of applying engineering science to real world problems, working in multidisciplinary teams to develop your interpersonal skills, and prepare you for a key aspect of modern engineering practice.</p> <p>You will develop key technical skills, enhance your creative thinking and learn from industry experts, as well as gaining knowledge and application skills in stress analysis, drivetrain systems, suspension, body engineering, design and management.</p>

	<p>Our course is structured so that its themes have a direct relevance to the industry's current and expected future needs, and upon graduating you will have the intellectual, technical and personal qualities necessary to successfully implement new technologies.</p> <p>Throughout your course you will benefit from our strong industry links with companies such as Norton Motorcycles, Jaguar LandRover and Continental Engineering Services.</p> <p>You will also have the opportunity to join our BCU Formula Student racing club, which designs and builds a racing car each July to race at an IMechE-sponsored event at Silverstone.</p>

7	Course Awards		
7a	Name of Final Award	Level	Credits Awarded
	Bachelor of Engineering with Honours Automotive Engineering	6	480
	Bachelor of Engineering with Honours Automotive Engineering with Professional Placement Year	6	600
7b	Exit Awards and Credits Awarded		
	Foundation Certificate Engineering	3	120
	Certificate of Higher Education Automotive Engineering	4	240
	Diploma of Higher Education Automotive Engineering	5	360
	Bachelor of Engineering Automotive Engineering	6	420

8	Derogation from the University Regulations

9	Delivery Patterns			
	Mode(s) of Study	Location(s) of Study	Duration of Study	Code(s)
	Full Time	City Centre	4 years	US0822F
	With Professional Placement Year	City Centre	5 years	US0822FS
	BEng (Hons) Full Time with Foundation Year	UAE Campus	4 years	US1434F

10	Entry Requirements
	<p>The admission requirements for this programme are stated on the programme page of the BCU website at https://www.bcu.ac.uk/ or may be found by searching for the programme entry profile located on the UCAS website.</p>

11	Course Learning Outcomes
	Science and Mathematics
1	Knowledge and understanding of the scientific principles underpinning relevant technologies, and their evolution.
2	Knowledge and understanding of mathematics and an awareness of statistical methods necessary to support application of key engineering principles.
3	Knowledge and understanding of scientific principles and methodology necessary to underpin their education in Automotive engineering, to enable appreciation of its scientific and engineering context, and to support their understanding of relevant historical, current and future developments and technologies.
4	Knowledge and understanding of mathematical and statistical methods necessary to underpin their education in Automotive engineering and to enable them to apply mathematical and statistical methods, tools and notations proficiently in the analysis and solution of engineering problems.
5	Ability to apply and integrate knowledge and understanding of other engineering disciplines to support study of their Automotive engineering discipline.
	Engineering Analysis
6	Ability to monitor, interpret and apply the results of analysis and modelling in order to bring about continuous improvement.
7	Ability to apply quantitative methods in order to understand the performance of systems and components.
8	Ability to use the results of engineering analysis to solve engineering problems and to recommend appropriate action.
9	Ability to apply an integrated or systems approach to engineering problems through know-how of the relevant technologies and their application.
10	Understanding of engineering principles and the ability to apply them to analyse key engineering processes.
11	Ability to identify, classify and describe the performance of systems and components through the use of analytical methods and modelling techniques.
12	Ability to apply quantitative and computational methods in order to solve engineering problems and to implement appropriate action.
13	Understanding of, and the ability to apply, an integrated or systems approach to solving engineering problems.
	Design
14	Be aware of business, customer and user needs, including considerations such as the wider engineering context, public perception and aesthetics.
15	Define the problem identifying any constraints including environmental and sustainability limitations; ethical, health, safety, security and risk issues; intellectual property; codes of practice and standards.
16	Work with information that may be incomplete or uncertain and be aware that this may affect the design.
17	Apply problem-solving skills, technical knowledge and understanding to create or adapt designs solutions that are fit for purpose including operation, maintenance, reliability etc.
18	Manage the design process, including cost drivers, and evaluate outcomes.
19	Communicate their work to technical and non-technical audiences.
20	Understand and evaluate business, customer and user needs, including considerations such as the wider engineering context, public perception and aesthetics.
21	Investigate and define the problem, identifying any constraints including environmental and sustainability limitations; ethical, health, safety, security and risk issues; intellectual property; codes of practice and standards.

22	Work with information that may be incomplete or uncertain and quantify the effect of this on the design.
23	Apply advanced problem-solving skills, technical knowledge and understanding, to establish rigorous and creative solutions that are fit for purpose for all aspects of the problem including production, operation, maintenance and disposal.
24	Plan and manage the design process, including cost drivers, and evaluate outcomes.
	Economic, Legal, Social, Ethical and Environmental Context
25	Understanding of the need for a high level of professional and ethical conduct in engineering and a knowledge of professional codes of conduct.
26	Knowledge and understanding of the commercial, economic and social context of engineering processes.
27	Knowledge of management techniques that may be used to achieve engineering objectives.
28	Understanding of the requirement for engineering activities to promote sustainable development.
29	Awareness of the relevant legal requirements governing engineering activities, including personnel, health & safety, contracts, intellectual property rights, product safety and liability issues.
30	Awareness of risk issues, including health and safety, environmental and commercial risk.
31	Knowledge and understanding of management techniques, including project management that may be used to achieve engineering objectives.
32	Understanding of the requirement for engineering activities to promote sustainable development and ability to apply quantitative techniques where appropriate.
33	Knowledge and understanding of risk issues, including health and safety, environmental and commercial risk, and of risk assessment and risk management techniques.
	Engineering Practice
34	Knowledge of contexts in which engineering knowledge can be applied (e.g. operations and management, application and development of technology, etc).
35	Understanding of and ability to use relevant materials, equipment, tools, processes, or products.
36	Knowledge and understanding of workshop and laboratory practice.
37	Ability to use and apply information from technical literature.
38	Ability to use appropriate codes of practice and industry standards.
39	Awareness of quality issues and their application to continuous improvement.
40	Awareness of team roles and the ability to work as a member of an engineering team.
41	Understanding of contexts in which engineering knowledge can be applied (e.g. operations and management, application and development of technology, etc).
42	Knowledge of characteristics of particular materials, equipment, processes or products.
43	Ability to apply relevant practical and laboratory skills.
44	Understanding of the use of technical literature and other information sources.
45	Knowledge of relevant legal and contractual issues.
46	Understanding of appropriate codes of practice and industry standards.
47	Ability to work with technical uncertainty.
48	Understanding of, and the ability to work in, different roles within an engineering team.
	Additional General Skills
49	Apply their skills in problem solving, communication, information retrieval, working with others and the effective use of general IT facilities.
50	Plan self-learning and improve performance, as the foundation for lifelong learning/CPD.
51	Plan and carry out a personal programme of work.
52	Exercise personal responsibility, which may be as a team member.

12	Course Requirements																																																															
12a	<p>Level 3:</p> <p><i>In order to complete this course a student must successfully complete all the following CORE modules (totalling 120 credits):</i></p> <table border="1" style="width: 100%; border-collapse: collapse;"> <thead> <tr> <th style="background-color: #ffffcc;">Module Code</th> <th style="background-color: #ffffcc;">Module Name</th> <th style="background-color: #ffffcc;">Credit Value</th> </tr> </thead> <tbody> <tr><td>ENG3009</td><td>Mathematics for Engineers 1</td><td>20</td></tr> <tr><td>ENG3010</td><td>Engineering Science 1</td><td>20</td></tr> <tr><td>ENG3011</td><td>Practical Skills 1</td><td>20</td></tr> <tr><td>ENG3012</td><td>Mathematics for Engineers 2</td><td>20</td></tr> <tr><td>ENG3013</td><td>Engineering Science 2</td><td>20</td></tr> <tr><td>ENG3014</td><td>Practical Skills 2</td><td>20</td></tr> </tbody> </table> <p>Level 4:</p> <p><i>In order to complete this course a student must successfully complete all the following CORE modules (totalling 120 credits):</i></p> <table border="1" style="width: 100%; border-collapse: collapse;"> <thead> <tr> <th style="background-color: #ffffcc;">Module Code</th> <th style="background-color: #ffffcc;">Module Name</th> <th style="background-color: #ffffcc;">Credit Value</th> </tr> </thead> <tbody> <tr><td>ENG4091</td><td>Engineering Principles 1</td><td>20</td></tr> <tr><td>ENG4124</td><td>Mathematical Modelling 1</td><td>20</td></tr> <tr><td>ENG4093</td><td>Engineering Practice</td><td>20</td></tr> <tr><td>ENG4094</td><td>Engineering Principles 2</td><td>20</td></tr> <tr><td>ENG4125</td><td>Mathematical Modelling 2</td><td>20</td></tr> <tr><td>ENG4096</td><td>Integrated Engineering Project</td><td>20</td></tr> </tbody> </table> <p>Level 5:</p> <p><i>In order to complete this course a student must successfully complete all the following CORE modules (totalling 120 credits):</i></p> <table border="1" style="width: 100%; border-collapse: collapse;"> <thead> <tr> <th style="background-color: #ffffcc;">Module Code</th> <th style="background-color: #ffffcc;">Module Name</th> <th style="background-color: #ffffcc;">Credit Value</th> </tr> </thead> <tbody> <tr><td>ENG5098</td><td>Thermodynamics and Fluid Mechanics</td><td>20</td></tr> <tr><td>ENG5099</td><td>Numerical Analysis</td><td>20</td></tr> <tr><td>ENG5100</td><td>Design and Materials</td><td>20</td></tr> <tr><td>ENG5097</td><td>Leading Engineering Endeavours</td><td>20</td></tr> <tr><td>ENG5101</td><td>Design and Manufacture</td><td>20</td></tr> <tr><td>ENG5102</td><td>Mechanical Science</td><td>20</td></tr> </tbody> </table>	Module Code	Module Name	Credit Value	ENG3009	Mathematics for Engineers 1	20	ENG3010	Engineering Science 1	20	ENG3011	Practical Skills 1	20	ENG3012	Mathematics for Engineers 2	20	ENG3013	Engineering Science 2	20	ENG3014	Practical Skills 2	20	Module Code	Module Name	Credit Value	ENG4091	Engineering Principles 1	20	ENG4124	Mathematical Modelling 1	20	ENG4093	Engineering Practice	20	ENG4094	Engineering Principles 2	20	ENG4125	Mathematical Modelling 2	20	ENG4096	Integrated Engineering Project	20	Module Code	Module Name	Credit Value	ENG5098	Thermodynamics and Fluid Mechanics	20	ENG5099	Numerical Analysis	20	ENG5100	Design and Materials	20	ENG5097	Leading Engineering Endeavours	20	ENG5101	Design and Manufacture	20	ENG5102	Mechanical Science	20

ENG5102	Mechanical Science	20																																																														

Professional Placement Year (optional)

In order to qualify for the award of Bachelor of Engineering with Honours Automotive Engineering with Professional Placement Year, a student must successfully complete all of the modules listed as well as the following Level 5 module:

Module Code	Module Name	Credit Value
PPY5004	Professional Placement	120

Level 6:

In order to complete this course a student must successfully complete all the following CORE modules (totalling 120 credits):

Module Code	Module Name	Credit Value
ENG6075	Computer Aided Engineering	20
ENG6076	Vehicle Electronics and Control	20
ENG6077	Body and Chassis Performance	20
ENG6078	Powertrain and Hybrid Vehicles	20
ENG6200	Individual Honours Project	40

12b Structure Diagram
Home and UAE Delivery

Level 3			
Practical Skills 1 (ENG3011)	Engineering Science 1 (ENG3010)	Mathematics for Engineers 1 (ENG3009)	Sem 1
Practical Skills 2 (ENG3014)	Engineering Science 2 (ENG3013)	Mathematics for Engineers 2 (ENG3012)	Sem 2
Level 4			
Engineering Practice (ENG4093)	Engineering Principles 1 (ENG4091)	Mathematical Modelling 1 (ENG4124)	Sem 1
Integrated Engineering Project (ENG4096)	Engineering Principles 2 (ENG4094)	Mathematical Modelling 2 (ENG4125)	Sem 2
Level 5			
Numerical Analysis (ENG5099)	Thermodynamics and Fluid Mechanics (ENG5098)	Design and Materials (ENG5100)	Sem 1
Leading Engineering Endeavours (ENG5097)	Mechanical Science (ENG5102)	Design and Manufacture (ENG5101)	Sem 2
Optional			
Professional Placement Year / Industrial Placement (PPY5004)			All Year
Level 6			
Individual Honours Project (ENG6200)	Powertrain and Hybrid Vehicles (ENG6078)	Computer Aided Engineering (ENG6075)	Sem 1
	Body and Chassis Performance (ENG6077)	Vehicle Electronics and Control (ENG6076)	Sem 2

13 Overall Student Workload and Balance of Assessment

Overall student *workload* consists of class contact hours, independent learning and assessment activity, with each credit taken equating to a total study time of around 10 hours. While actual contact hours may depend on the optional modules selected, the following information gives an indication of how much time students will need to allocate to different activities at each level of the course.

- *Scheduled Learning* includes lectures, practical classes and workshops, contact time specified in timetable
- *Directed Learning* includes placements, work-based learning, external visits, on-line activity, Graduate+, peer learning
- *Private Study* includes preparation for exams

The *balance of assessment* by mode of assessment (e.g. coursework, exam and in-person) depends to some extent on the optional modules chosen by students. The approximate percentage of the course assessed by coursework, exam and in-person is shown below.

Level 3

Workload

40% time spent in timetabled teaching and learning activity

Activity	Number of Hours
Scheduled Learning	480
Directed Learning	336
Private Study	384
Total Hours	1200

Balance of Assessment

Assessment Mode	Percentage
Coursework	30%
Exam	47%
In-Person	23%

Level 4

Workload

44% time spent in timetabled teaching and learning activity

Activity	Number of Hours
Scheduled Learning	528
Directed Learning	336
Private Study	336
Total Hours	1200

Balance of Assessment

Assessment Mode	Percentage
Coursework	33%
Exam	43%
In-Person	23%

Level 5
Workload
24% time spent in timetabled teaching and learning activity

Activity	Number of Hours
Scheduled Learning	228
Directed Learning	192
Private Study	720
Total Hours	1200

Balance of Assessment

Assessment Mode	Percentage
Coursework	60%
Exam	35%
In-Person	5%

Level 6
Workload
19% time spent in timetabled teaching and learning activity

Activity	Number of Hours
Scheduled Learning	232
Directed Learning	224
Private Study	744
Total Hours	1200

Balance of Assessment

Assessment Mode	Percentage
Coursework	46%
Exam	54%
In-Person	0%
