

Course Specification

Course Summary Information			
1	Course Title		BSc (Hons) Cyber Security with Foundation Year
2	BCU Course Code	UCAS Code	US0937F 1009
3	Awarding Institution		Birmingham City University
4	Teaching Institution(s) (if different from point 3)		
5	Professional Statutory or Regulatory Body (PSRB) accreditation (if applicable)		

6	Course Description
	<p>Want to study a Cyber Security degree? Cyber Security with a Foundation Year ensures you will develop a range of academic and technical skills relevant to cyber security.</p> <p>The Foundation Year course option enables you to study for our BSc (Hons) degree over an extended full-time duration of four years by including a Foundation Certificate (year one of four). The Foundation Certificate provides a broad study programme that underpins the follow-on degree. In order to progress to the next year of your degree, it is necessary to achieve a pass in all of the modules of the Foundation Certificate.</p> <p>The BSc Cyber Security course is designed to equip you with state-of-the-art technical knowledge, intellectual know-how, management capabilities and practical skills that will enable you to succeed in meeting the cyber security challenges facing modern organisations. In the 21st century, data has become a necessary commodity, which has value in isolation and more so when viewed as a larger data set for trends and habits. Data is key to the functioning of modern business and the protection of this data is key to the ongoing success of the digital economy. As systems, such as IoT, both generate and consume data grow in capability and complexity, the need to protect the data created, stored and transited across public and private networks intensifies. Due to this, the need for suitably qualified cyber security practitioners has never been greater.</p> <p>This course will provide you with the knowledge and skills needed by the employers. Our strong links with industry enable us to teach the most demanding and up-to-date topics. You will learn state of the art technical knowledge, intellectual know-how, management capabilities and hands-on practical skills to succeed in meeting the cyber security challenges faced by modern organisations.</p> <p>This course is supported by a vibrant research environment within the department of Network and Cyber Security at BCU and by traditionally strong industrial links with CISCO, Oracle, IBM, Microsoft, UK Fast, Linux Professional Institute and BT.</p>

	<p>What's covered in the course?</p> <p>Secure information technologies form the bedrock of our modern connected mobile society. Our /BSc Cyber Security course will equip you to enter this growing and important industry.</p> <p>The course takes a practice-led approach, making use of equipment and tools found in the industry to give you the best preparation for a successful career. Our approach prioritises the practical skills sought by industry, backing this up with a thorough understanding of theory. The course delivers the latest in computing, network and security technologies, with the opportunity to gain additional accreditation from Cisco, Juniper, Huawei and the Linux Professional Institute.</p> <p>The course delivers a well-rounded curriculum in the security of the communication networks; the security of computer processing and storage equipment and the software that runs on it, both private and public, and both local and cloud based; the security and accuracy of information and information systems; and the forensic analysis of threats and attacks, as well as management-level skills such as project and change management, maximising your career potential.</p> <p>Studying computing with us puts you at the heart of an exciting, innovative community. Upon graduation you could progress into a career as a cyber-security engineer, network administrator, and cyber security analyst or network security architect.</p>

7	Course Awards		
7a	Name of Final Award	Level	Credits Awarded
	Bachelor of Science with Honours Cyber Security	6	480
	Bachelor of Science with Honours Cyber Security with Professional Placement Year	6	600
7b	Exit Awards and Credits Awarded		
	Foundation Certificate Computing	3	120
	Certificate of Higher Education Cyber Security	4	240
	Diploma of Higher Education Cyber Security	5	360
	Bachelor of Science Cyber Security	6	420

	Derogation from the University Regulations
	Not applicable

9	Delivery Patterns			
	Mode(s) of Study	Location	Duration of Study	Code
	Full Time	City Centre	4 years	US0937F
	With Professional Placement Year	City Centre	5 years	US0937FS

10	Entry Requirements
	The admission requirements for this course are stated on the course page of the BCU website at https://www.bcu.ac.uk/ or may be found by searching for the course entry profile located on the UCAS website.

11	Course Learning Outcomes
	Knowledge & Understanding
1	Demonstrate knowledge and understanding of key cyber security concepts, mechanisms, services and protocols that are used as basic building blocks for engineering security solutions.
2	Analyse trends of cyber-attacks, evolving security threats, the mechanisms for monitoring and detecting them, protection controls for mitigating their risks and approaches for holistic cyber defence.
3	Apply best practices for security management within an enterprise abiding by legal obligations, regulatory requirements, international standards, ethical considerations, good governance, incident response and business continuity plans.
4	Demonstrate knowledge and understanding of cyber security topics such as network security, digital forensics, AI, information assurance, security testing, threat modelling and secure software development.
	Cognitive & Intellectual Skills
5	Systematically analyse security threats to information assets of an organisation, propose suitable countermeasures and justify choices using relevant quantitative and qualitative methods for evaluating associated business risk.
6	Evaluate the conformance of security management processes of an organisation against international security standards, such as ISO 27000, identifying gaps and recommend mitigations
7	Apply design principles such as least privileges, fail secure, and defence in depth to engineer security, privacy and resilience.
8	Analyse and correlate digital forensic information from a variety of sources such as audit logs, hard disks, operating systems, file systems and web browsers in order to detect breaches of security policy, law or regulations.
	Practical & Professional Skills
9	Utilise digital forensic tools for collecting, analysing, and processing electronic evidence through application of forensically-sound methodologies.
10	Demonstrate hands-on experience of security testing tools to systematically identify certain types of vulnerabilities in communication network infrastructures.
11	Apply appropriate tools to manage threats against software or systems.
12	Propose a contingency plan, consistent with the organisation's view of associated risks, to ensure business continuity for an organisation upon the detection of an adverse event
	Key Transferable Skills
13	Apply skills in research, independent study, career planning, self-management, including time management and prioritisation of tasks when tackling complex problems.
14	Demonstrate effective communication skills in writing, orally, and in presentations to specialist and non-specialist audiences. Be able to explain, justify and otherwise defend their work and ideas, both in its specific details and within a broader context
15	Demonstrate team-spirit by cooperating with others, plan and implement tasks at a professional level and contribute to team goals through making sound judgments.

16	Develop confidence and a resilient approach to undertake a substantial piece of practical work without close supervision.

12	Course Requirements																																																															
12a	<p>Level 3:</p> <p><i>To complete this course, you must successfully complete all the following CORE modules (totalling 120 credits):</i></p> <table border="1"> <thead> <tr> <th>Module Code</th> <th>Module Name</th> <th>Credit Value</th> </tr> </thead> <tbody> <tr> <td>CMP3010</td> <td>Fundamental Mathematics</td> <td>20</td> </tr> <tr> <td>CMP3014</td> <td>Fundamentals of Digital Technology</td> <td>20</td> </tr> <tr> <td>CMP3012</td> <td>Web Application Design</td> <td>20</td> </tr> <tr> <td>CMP30xx</td> <td>Emerging Technologies</td> <td>20</td> </tr> <tr> <td>CMP30xx</td> <td>Independent Practice</td> <td>20</td> </tr> <tr> <td>CMP3009</td> <td>Foundations of Programming</td> <td>20</td> </tr> </tbody> </table> <p>Level 4:</p> <p><i>To complete this course, you must successfully complete all the following CORE modules (totalling 120 credits):</i></p> <table border="1"> <thead> <tr> <th>Module Code</th> <th>Module Name</th> <th>Credit Value</th> </tr> </thead> <tbody> <tr> <td>CMP4267</td> <td>Computer Systems</td> <td>20</td> </tr> <tr> <td>CMP4298</td> <td>Cyber Security Fundamentals</td> <td>20</td> </tr> <tr> <td>CMP4265</td> <td>Applied Operating Systems</td> <td>20</td> </tr> <tr> <td>CMP4266</td> <td>Computer Programming</td> <td>20</td> </tr> <tr> <td>CMP4268</td> <td>Mathematics for Computing</td> <td>20</td> </tr> <tr> <td>CMP4269</td> <td>Network Fundamentals</td> <td>20</td> </tr> </tbody> </table> <p>Level 5:</p> <p><i>To complete this course, you must successfully complete all the following CORE modules (totalling 120 credits):</i></p> <table border="1"> <thead> <tr> <th>Module Code</th> <th>Module Name</th> <th>Credit Value</th> </tr> </thead> <tbody> <tr> <td>CMP5355</td> <td>Software Security</td> <td>20</td> </tr> <tr> <td>CMP5319</td> <td>Systems Security Attacks and Defences</td> <td>20</td> </tr> <tr> <td>CMP5372</td> <td>Applied Cyber Forensics</td> <td>20</td> </tr> <tr> <td>CMP5356</td> <td>Cyber Security Operations</td> <td>20</td> </tr> <tr> <td>CMP5320</td> <td>Networking Technologies</td> <td>20</td> </tr> <tr> <td>CMP5321</td> <td>Programming for Network Engineers</td> <td>20</td> </tr> </tbody> </table>	Module Code	Module Name	Credit Value	CMP3010	Fundamental Mathematics	20	CMP3014	Fundamentals of Digital Technology	20	CMP3012	Web Application Design	20	CMP30xx	Emerging Technologies	20	CMP30xx	Independent Practice	20	CMP3009	Foundations of Programming	20	Module Code	Module Name	Credit Value	CMP4267	Computer Systems	20	CMP4298	Cyber Security Fundamentals	20	CMP4265	Applied Operating Systems	20	CMP4266	Computer Programming	20	CMP4268	Mathematics for Computing	20	CMP4269	Network Fundamentals	20	Module Code	Module Name	Credit Value	CMP5355	Software Security	20	CMP5319	Systems Security Attacks and Defences	20	CMP5372	Applied Cyber Forensics	20	CMP5356	Cyber Security Operations	20	CMP5320	Networking Technologies	20	CMP5321	Programming for Network Engineers	20
Module Code	Module Name	Credit Value																																																														
CMP3010	Fundamental Mathematics	20																																																														
CMP3014	Fundamentals of Digital Technology	20																																																														
CMP3012	Web Application Design	20																																																														
CMP30xx	Emerging Technologies	20																																																														
CMP30xx	Independent Practice	20																																																														
CMP3009	Foundations of Programming	20																																																														
Module Code	Module Name	Credit Value																																																														
CMP4267	Computer Systems	20																																																														
CMP4298	Cyber Security Fundamentals	20																																																														
CMP4265	Applied Operating Systems	20																																																														
CMP4266	Computer Programming	20																																																														
CMP4268	Mathematics for Computing	20																																																														
CMP4269	Network Fundamentals	20																																																														
Module Code	Module Name	Credit Value																																																														
CMP5355	Software Security	20																																																														
CMP5319	Systems Security Attacks and Defences	20																																																														
CMP5372	Applied Cyber Forensics	20																																																														
CMP5356	Cyber Security Operations	20																																																														
CMP5320	Networking Technologies	20																																																														
CMP5321	Programming for Network Engineers	20																																																														

Professional Placement Year (optional)

To qualify for the award of Bachelor of Science with Honours Cyber Security with Foundation Year and Professional Placement Year, you must successfully complete all the modules listed as well as the following Level 5 module:

Module Code	Module Name	Credit Value
PPY5004	Professional Placement	120

Level 6:

To complete this course, you must successfully complete all the following CORE modules (totalling 120 credits):

Module Code	Module Name	Credit Value
CMP6200	Individual Honours Project	40
CMP6176	Ethical Hacking	20
CMP6238	Applied AI for Cyber Security	20
CMP6189	Network and Internetwork Forensics	20
CMP6210	Cloud Computing	20

12b Structure Diagram3

Year 5 - Level 6			
Semester 2	Individual Honours Project [40 Credits]	Cloud Computing [20 Credits]	Ethical Hacking [20 Credits]
Semester 1		Applied AI for Cyber Security [20 Credits]	Network and Internetwork Forensics [20 Credits]
Professional Placement Year 4 (Optional) 120 Credits			
Year 3 - Level 5			
Semester 2	Cyber Security Operations [20 Credits]	System Security Attacks and Defences [20 Credits]	Applied Cyber Forensics [20 Credits]
Semester 1	Software Security [20 Credits]	Programming for Network Engineers [20 Credits]	Networking Technologies [20 Credits]
Year 2 - Level 4			
Semester 2	Cyber Security Fundamentals [20 Credits]	Applied Operating Systems [20 Credits]	Network Fundamentals [20 Credits]
Semester 1	Computer Programming [20 Credits]	Maths for Computing [20 Credits]	Computer Systems [20 Credits]
Year 1 - Level 3			
Semester 2	Emerging Technologies [20 Credits]	Independent Practice [20 Credits]	Foundations of Programming [20 Credits]
Semester 1	Fundamental Mathematics [20 Credits]	Fundamentals of Digital Technology [20 Credits]	Web Application Design [20 Credits]

13 Overall Student Workload and Balance of Assessment

Overall student *workload* consists of class contact hours, independent learning and assessment activity, with each credit taken equating to a total study time of around 10 hours. While actual contact hours may depend on the optional modules selected, the following information gives an indication of how much time students will need to allocate to different activities at each level of the course.

- *Scheduled Learning* includes lectures, practical classes and workshops, contact time specified in timetable
- *Directed Learning* includes placements, work-based learning, external visits, on-line activity, Graduate+, peer learning
- *Private Study* includes preparation for exams

The *balance of assessment* by mode of assessment (e.g. coursework, exam and in-person) depends to some extent on the optional modules chosen by students. The approximate percentage of the course assessed by coursework, exam and in-person is shown below.

Level 3

Workload

37% time spent in timetabled teaching and learning activity

Activity	Number of Hours
Scheduled Learning	456
Directed Learning	400
Private Study	344
Total Hours	1200

Balance of Assessment

Assessment Mode	Percentage
Coursework	78%
Exam	0
In-Person	22%

Level 4

Workload

24% time spent in timetabled teaching and learning activity

Activity	Number of Hours
Scheduled Learning	292
Directed Learning	469
Private Study	439
Total Hours	1200

Balance of Assessment

Assessment Mode	Percentage
Coursework	80%
Exam	20%
In-Person	0%

Level 5
Workload

24% time spent in timetabled teaching and learning activity

Activity	Number of Hours
Scheduled Learning	288
Directed Learning	490
Private Study	422
Total Hours	1200

Balance of Assessment

Assessment Mode	Percentage
Coursework	70%
Exam	22%
In-Person	8%

Level 6
Workload

17% time spent in timetabled teaching and learning activity

Activity	Number of Hours
Scheduled Learning	202
Directed Learning	334
Private Study	664
Total Hours	1200

Balance of Assessment

Assessment Mode	Percentage
Coursework	94%
Exam	0%
In-Person	6%
