6	Course Description (Marketing text for website)		
	<p>The course content is designed to ensure graduates develop the pedagogical practice required to coach athletes across a range of ages and abilities, as well as the delivery of all areas of the Physical Education curriculum at both Primary and Secondary school level. Following graduation, you will be in a position to gain employment within a sports coaching or school sport setting, or embark on postgraduate studies, such as a PGCE in Physical Education or an MSc in High Performance Sports Coaching, both of which are offered here at Birmingham City University.</p> <p>What's covered in the course?</p> <p>We will help you develop a keen understanding of your own coaching and teaching philosophy, along with providing you with industry and cultural factors that influence the wider context of sport. You will gain practical application of the theoretical underpinnings of coaching and PE teaching and have access to hands-on experiences.</p> <p>Physical education continues to be an important part of Government agendas, so with this in mind, you will also learn relevant and up-to-date information that is linked and mapped to the National Curriculum for Physical Education (NCPE). You will be taught the contemporary information that educators within this sector require. It won't just be about sport either; you'll be looking at different aspects of health and people at opposite ends of the health spectrum. It's a chance for you to gain the knowledge and skills needed to negotiate different challenges in your future profession.</p> <p>To help build these skills, you'll go on placements, working face-to-face and gaining first-hand experience in a coaching and/or school environment, something which will enhance your future employability.</p> <p>By studying this course, you'll be studying at our recently extended campus in Edgbaston, Birmingham, which contains a state-of-the-art sport and exercise laboratory, sports therapy rooms, cutting-edge resources and a designated sports area.</p>

13 Overall Student Workload and Balance of Assessment

Overall student *workload* consists of class contact hours, independent learning and assessment activity, with each credit taken equating to a total study time of around 10 hours. While actual contact hours may depend on the optional modules selected, the following information gives an indication of how much time students will need to allocate to different activities at each level of the course.

- *Scheduled Learning* includes lectures, practical classes and workshops, contact time specified in timetable
- *Directed Learning* includes placements, work-based learning, external visits, on-line activity, Graduate+, peer learning
- *Private Study* includes preparation for exams

The *balance of assessment* by mode of assessment (e.g. coursework, exam and in-person) depends to some extent on the optional modules chosen by students. The approximate percentage of the course assessed by coursework, exam and in-person is shown below.

Level 4

Workload

% time spent in timetabled teaching and learning activity

Activity	Number of Hours
Scheduled Learning	240
Directed Learning	422
Private Study	538
